

MOBILE VOLTAGE 30 kVA STABILIZER

3:3
PHASE

- IP55 Protected
- Environmental Conditions: MIL-STD-810G w/Change 1
- EMI / EMC MIL-STD-461F
- True Static-Modular Design with Thyristor and SMPS Technology
- High Voltage Correction Speed
- Maintenance-Free Technology

Military Standard Compliant Surface Coating and Painting

Maximum Flexibility

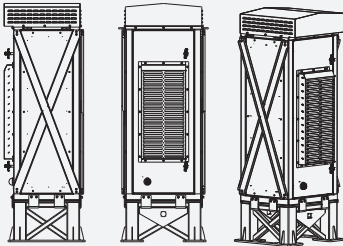

Excellent Performance

Optimizes Total Cost

Easy Installation

Metal surface coating and painting have been performed in compliance with military standards and have successfully passed tests according to MIL-STD-810G w/Change 1. It has also been successfully tested and verified against EMI/EMC standards MIL-STD-461F.

Microprocessor-controlled, compatible with all load types; detects and corrects mains voltage fluctuations within 20 ms at 500 V/s.

Optimizes irregular grid power, providing electricity customized for your facility and electronic equipment.
