

LIGHTING TOWER 5-35 kVA DIESEL GENERATORS 4,5-2500kVA

- High Reliability and Performance in Harsh Conditions
- Fuel Efficiency and Long Operating Time
- Quick Installation and Easy Portability
- Smart Control and Remote Monitoring
- Modularity and Multi-Purpose Use

Industrial Generators and Lighting

High Efficiency

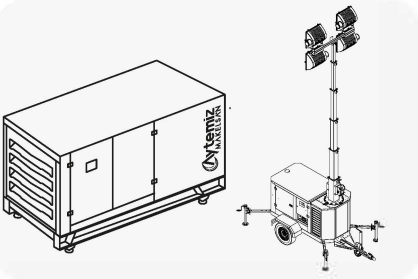

Silent Design

Optimizes Total Cost

Easy Installation

With a compact and mobile design, the system enables quick installation and easy portability, while smart control and remote monitoring features provide full operational control. Its modular structure allows adaptation to various mission requirements, offering flexible and scalable solutions.

Designed for harsh field conditions, our diesel generators and lighting towers deliver high reliability, low fuel consumption, and long-duration uninterrupted operation. Beyond standard products, our mission-specific solutions ensure operational stealth with low noise and reduced thermal signature, while maintaining superior performance in all environments.
