

TACTICAL SILENT GENERATOR 5 kVA

- 5 kVA Continuous Power
- Full performance Between -35°C and +50°C.
- Operates at Only 56 dB Noise Level at a 7-Meter Distance.
- Water-Cooled System for Efficient Heat Management.
- Durable Enclosure With Military Camouflage Finish.

Designed for Harsh Conditions

Rugged Design

Super Silend Design

Easy Installation

Extreme Field Durability: Provides uninterrupted and high-performance power generation under harsh conditions such as 3000 meters altitude, 90% humidity, and wind speeds up to 120 km/h.

Advanced Control Unit: The system enables real-time monitoring of critical data and offers practical operation with engine preheating and bypass functions.

High Efficiency and Safety: Ensures long operating hours with low fuel consumption while maximizing safety with its IP54-protected alternator.
